Cut along the solid lines

Instructions:

1. Begin by carefully cutting along the solid lines around the circle. These will be the top and base of your spinner wheel.
2. Label each segment on the second base with different themes or messages such as "Reduce, Reuse, Recycle", "Plant Trees", "Conserve Water", "Save Energy", "Clean the Oceans", and "Protect Wildlife".
3. After cutting out the circle and labelling, encourage children to use colours that represent nature, such as green for forests, blue for oceans, and green/blue for the earth.
4. Once colouring is completed, create a hole in the centre and attach the two pieces using a metal brad or fastener.
