

[Download the file](#)[Print the file](#)

Instructions:

1. Start by downloading and printing both pages of the activity.
2. Carefully cut around the dotted circle that outlines the Earth.
3. Cut along the four dotted lines on the globe to make flaps, stop at the centre so they stay attached.
4. Fold each flap back so that you can lift it to reveal what's underneath.
5. From the second worksheet, cut out the Earth and the four labelled sections: Reuse, Reduce, Recycle, and Repurpose.
6. Glue the second cut-out under and make sure to glue it under the matching flap on the first globe.
7. Open each flap to learn how to help the Earth with the 4Rs!
