Instructions:

1. Start by downloading and printing your worksheet. It includes: a wreath template (outer circle with recycling items) and Earth shape cut-out options.
2. Carefully use scissors to cut along the outer circle of the wreath. You'll be left with a ring shape, this will be your wreath base.
3. Look around your wreath, you'll find images of recycling items. Use bright colours like crayons, markers, or coloured pencils to bring them to life.
4. Once done, you'll see different Earth shapes to choose from the other template. Pick your favourite and carefully cut it out using scissors.
5. Decorate your Earth using blue for the oceans and green for the land.
6. Stick the Earth cut-out on the wreath. You can place it right at the bottom in centre.
7. Hang your finished Earth Wreath on your wall, door, or classroom to celebrate World Environment Day!
