Instructions:

1. Start by downloading and printing your "Reduce, Recycle & Recycle" worksheet.
2. Gather your colouring supplies like crayons, coloured markers, or pencil colours.
3. Introduce the concepts of reducing waste, reusing items, and recycling materials. Explain why these actions are important for protecting our planet.
4. Colour the images on the worksheet using bright, vibrant colours to make the activity fun and engaging.
5. Discuss practical actions as you colour like turning off lights when not needed, using reusable bags, or sorting rubbish correctly to help students connect the ideas to their daily lives.
6. Share your completed worksheet with classmates, family members, or friends to spread awareness about the importance of caring for the environment.
