## Instructions:

1. Begin by downloading and printing your Interactive Waste Sorting Worksheet.
2. You will see different bins on the worksheet (red bin, green bin, yellow bin, and green bin).
3. Grab your crayons, coloured pencils, or markers. Colour each bin to match its label (red, green, yellow, and blue), and then also colour the products in the box.
4. Each bin has labels (such as newspapers/magazines, office paper, junk mail, egg cartons, soft plastics, and more). These will help you decide where each item belongs.
5. Carefully cut along the dotted lines to separate the waste item pictures at the bottom of each page.
6. Glue each item into the correct section of the bin that matches the label.
7. Continue until all items are sorted into the correct bins.
8. When you're done, carefully fold along the lines to create a fun 3D bin effect.
