Instructions:

1. Download and print your World Environment Day - Nature Wind Chime worksheet.
2. Use crayons, coloured pencils, or markers to colour all the nature-themed wind chime pieces.
3. Once you have finished colouring, carefully cut around each shape by following the dotted lines.
4. Punch a hole on each black dot shown on the wind chime pieces.
5. Cut 4–5 pieces of string, ribbon or string. Make sure each piece is long enough for the wind chime shapes to hang down nicely.
6. Thread the string through the holes and tie each coloured shape securely.
7. Stick all the strings onto the 'I care for my planet' cut-out. Spread the strings out evenly so the wind chime pieces can hang freely and move gently..
8. Hang your finished wind chime in the classroom, near a window, or at home.
