Instructions:

1. Download the worksheet and print it out.
2. Examine the Organics & Green, Waste Bin, or Recycling Bin and learn what each bin is used for.
3. Look at each item and decide whether it can decompose naturally or belongs in general waste.
4. Use crayons, coloured pencils, or markers to colour the bins and all the items.
5. Cut out each item and glue it into the correct bin: Organics & Green or Waste.
6. Review your sorting and make sure each item has been placed in the correct bin.
7. Talk about why composting is important, how it reduces landfill waste, and how it helps the environment.

COMPOPST SORTING GAME WORKSHEET
