Instructions:

1. Download the worksheet and print it out.
2. Colour the lantern panels, handle, and all the icons, including love, peace, Earth, children, leaves, and stars.
3. Carefully cut along the outer solid lines of the lantern template. Cut out the two long handle strips along the dashed outer lines.
4. Fold along all the dashed lines to form the sides and flaps of the lantern.
5. Apply glue to the tabs, then fold them inward to join the lantern and create its 3D shape. Press gently until the glue is secure.
6. Fold each handle strip along the dashed lines and glue the ends to the inside of the lantern on opposite sides.
7. Once the glue is dry, gently open and shape your lantern. Hang or display it as a reminder that peace, kindness, and love bring us together.
